ALBERTA DIRECT TRADE

Alberta direct trade on Wednesday saw light trade develop with dressed sales at \$595.00/cwt delivered, \$3.00-5.00/cwt higher than the previous week. Competition on the cash market is not as strong as it was last week. Alberta fed prices are trading at a premium over the Eastern Canadian market. Fed cattle from Manitoba/Saskatchewan are coming west into Alberta for processing. Canfax released its monthly Trends report the other day. Yearling steers and heifers placed in October/November and sold on the cash market in June on average feedlot margins were \$275.00/head positive. For cattle sold on the cash market, feedlots have been profitable for the past eighteen months. Over the past 30 years this is the second longest profitability streak. The only other years that were longer was back on 2014/2015.

U.S. TRADE (U.S. FUNDS)

The U.S. cash cattle trade saw light trade reported in Nebraska yesterday with dressed sales at \$408.00/cwt, steady with prices seen earlier in the week and steady with last week. Workers at the Fort Morgan beef plant remain on strike and it sounds like very little headway is being made between the union and Cargill. Looking at the feeder market, the US feeder index has rallied \$10/cwt, over the past week and is trading very close to record highs.
