ALBERTA DIRECT TRADE

Alberta direct trade on Tuesday saw no new trade to report but there is a good chance scattered trade will develop by this afternoon. There have been reports some October contract cattle have not yet been delivered to the plant. Non-fed volumes have seasonally increased which could potentially take hook space away from fed cattle. Calf and feeder prices are looking lower this week Alberta 850 steer and heifer price are currently $5/cwt shy of their recent lows set back in August. From a seasonal perspective it is not uncommon to see heavier weight feeder prices drift lower from now through until the end of the year. Based on the five-year average 850lbs steer price historically drops 5% from October to December.

U.S. TRADE (U.S. FUNDS)

The U.S. cash cattle trade saw light trade reported in Nebraska yesterday with dressed sales at $340.00/cwt and live sales were at $218.00/cwt. Dressed sales are anywhere from $8.00-20.00/cwt lower than last week while live sales are $6.00/cwt weaker. The price rally that occurred in October has completely been erased. Business in the Southern US has been quiet with no bids to speak of. There have been reports the Maritimes Association and the International Longshore and Warehouse Union have signed a contract temporarily postponing a potential work stoppage at the Los Angeles and Long beach ports. It is estimated around 25% of US beef exports flows through these two ports.
