ALBERTA DIRECT TRADE

Alberta direct trade on Tuesday saw no new trade to report. Asking prices have been reported at \$505+/cwt delivered. Western Canadian fed processing for the week ending September 26th totaled just over 45,000 head, the largest processing volume since January 2024. This is the third consecutive week that processing volumes have been higher than last year. Processing rates have also increased in Eastern Canada, a clear sign that the packer is making some money.

U.S. TRADE (U.S. FUNDS)

The U.S. cash cattle trade saw no new trade to report and no bids to speak of today. Trade will likely hold off for at least another day. Wholesale beef prices have been impressive however; pressure has been noted on both the 50% and 90% trim market. Historically large fed cattle carcass weights have weighted on the 50% trim market, US 50% trim prices are trading at the lowest point sine December 2024. Cow slaughter rates have seasonally started to tick higher pressuring the 90% trim market. On top of that, overseas beef imports continue to be historically large weighing on prices as well. Since early August 90% trim prices have dropped 14%.
