ALBERTA DIRECT TRADE

Alberta direct trade on Tuesday saw no new trade to report. This week's showlist is smaller than the previous week. Over the past month Alberta fed prices have been trading at a \$15.00-17.00/cwt discount against the US market. Basis levels are weaker than last year, yet fewer slaughter cattle are being shipped South compared to last year. Higher fuel prices, and more cattle on feed in the Pacific Northwest compared to last year could be limiting export volumes.

U.S. TRADE (U.S. FUNDS)

The U.S. cash cattle trade saw no new trade to report, and significant trade will likely hold off until Thursday or Friday. Asking prices are poorly defined but are expected to start out around \$227.00/cwt in the North and \$230.00/cwt in the South. Showlist volumes have been reported smaller in Nebraska and Colorado. According to USDA packers have fewer October contract cattle compared to last year. US beef imports for August were 26% larger than last year. The top supplier of beef in August was Australia. Beef shipments from Australia were the largest since 2003. YTD beef imports from all major trading partners are running above last year.
